

LEGO ROBOTICS CLUB

Mondays: 3:30- 4:30
Ages 1st grade & Up

Turn legos into robots and other masterpieces! Lego robotics club is going to be doing some NEW AND EXCITING things! Using legos and computers, kids will learn to build robots that move & talk. Watch our robots get bigger and more exciting as we build on our lego and programming skills each week!

This year, build and watch:

A Spin Art Machine where you can make your own spin art creations!

A Pitching Machine and Batter ----- A Robot Arm ----- A Rattlesnake

An Explorer – AND MORE!

*Robots & legos do not go home, however, plenty of pictures will.

*Club acceptance is on a trial basis. We are working with laptops and batteries and this year we will be doing a lot of very fun but intricate and delicate work on the robots and good behavior is imperative.
